

[Australian Botanical Soap](#) is the latest member to join our Happy Partnership Crew! They have kicked it off by committing a minimum of 2000 bars of soap annually. Soap is a non negotiable when it comes to packing a Happy Box. We've heard reports from our coordinators that soap is often used for a variety of purposes in a remote community when other products are hard to source. It becomes shampoo, laundry powder and even dog wash! We love that ABS is family owned, Australian made and smells and feels luxurious. We are equal parts excited and proud to announce every future Happy Box will contain one of these bars.
